

### SINGLE LAYER OF FIRE SHEET

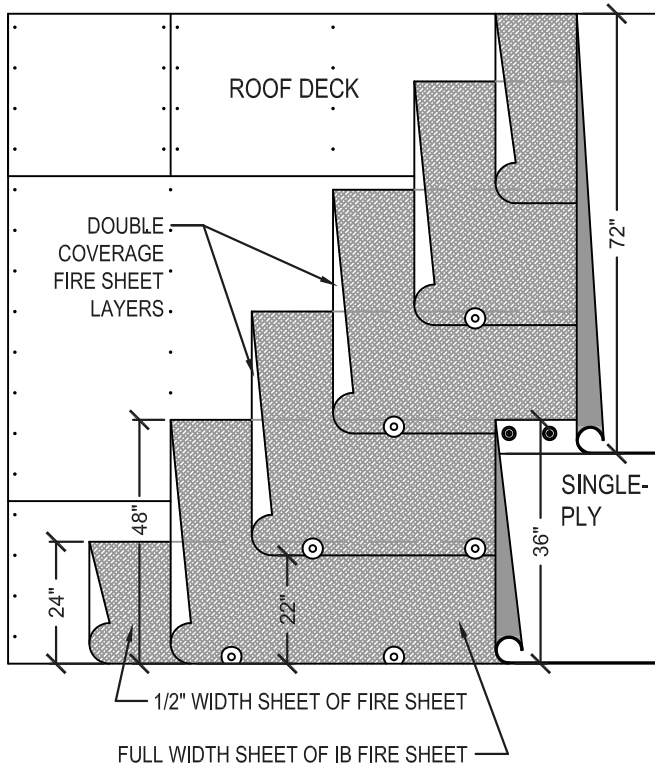

FIRE SHEET	SLOPE	FIRE RATING	LAYERS
Fire Sheet-10	1-1/2"	Recover: Maintains existing Fire Rating	1
Fire Sheet-10 or Fire Sheet-50	0-1/2"	New / Re-Roofs Class 'B'	1

**NOTES:**

1. Fire Sheet is typically used over combustible roof decks (I.E. plywood OSB / wood plank) in combination with Single Ply to achieve either a Class 'A' or 'B' Fire Rating. \*See graph for requirements.
2. Fire Ratings for IB Roof Systems can be found on the Underwriters Laboratory (UL) website: [www.ul.com](http://www.ul.com)
3. Fire Sheets are to be attached to the roof deck with # 12, # 14, # 15, or XHD screws and insulation plates. Fastener spacing may vary depending on AHJ.

### DOUBLE LAYER OF FIRE SHEET

FIRE SHEET	SLOPE	FIRE RATING	LAYERS
Fire Sheet-10	0-3/4"	Class 'A'	2
Fire Sheet-50	0-1/2"	Class 'A'	2

**NOTES:**

1. Fire Sheet is typically used over combustible roof decks (I.E. plywood OSB / wood plank) in combination with Single Ply to achieve either a Class 'A' or 'B' Fire Rating. \*See graph for requirements.
2. Fire Ratings for IB Roof Systems can be found on the Underwriters Laboratory (UL) website: [www.ul.com](http://www.ul.com)
3. Fire Sheets are to be attached to the roof deck with # 12, # 14, # 15, or XHD screws and insulation plates. Fastener spacing may vary depending on AHJ.
