

Technical Data Sheet: Single-Ply Flashing Membrane

Product Description: IB Single-Ply flashing membrane is a PVC membrane in a 60 mil thickness, in 12" wide-by-22-foot (22 sq.ft.) rolls. IB Single-Ply flashing membrane is a non-reinforced scrim, pliable product that is utilized for detail work that requires a stretchable membrane. It is made up of the same Single-Ply formulation as the IB Single-Ply/CPA membranes.

Packaging: IB Single-Ply flashing membranes are shrink wrapped and palletized with other roofing system components. Roll weight: 10.5 lbs.

Uses: IB Single-Ply Flashing Membrane is used at critical areas like canted corners, field wrapped penetrations, roof drains/overflows/scuppers, and relief cuts.

Available Colors: Available in all standard IB membrane colors.

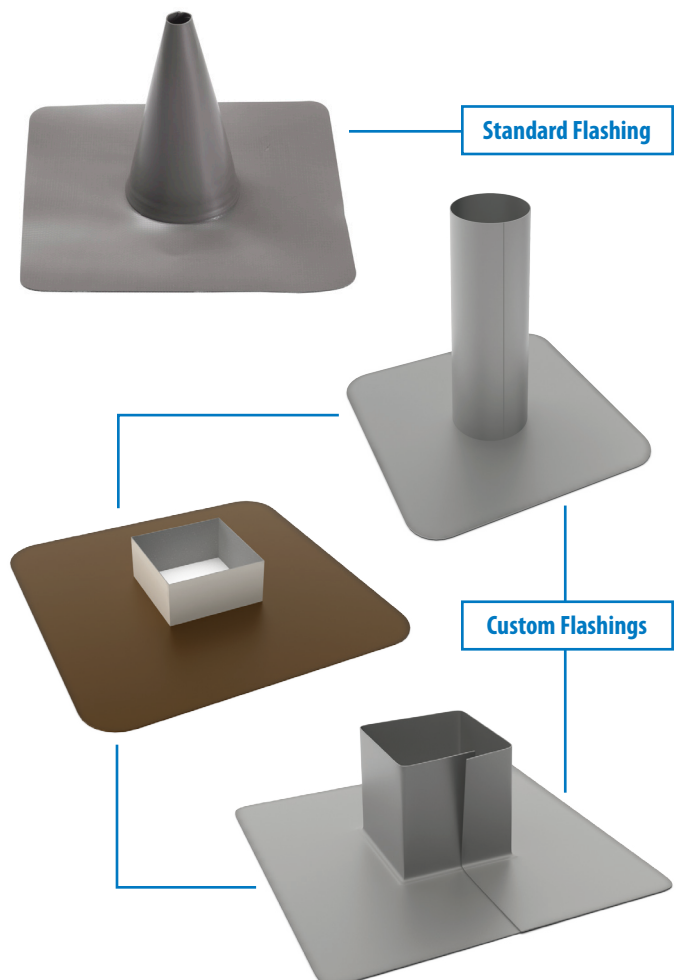

Technical Data Sheet: Single-Ply Penetration Flashings

Product Description: IB factory fabricated cone flashings feature a dielectrically welded reinforced base and a 60 mil non-reinforced single-ply upper. IB factory fabricated cone flashings are designed to flash roof penetrations such as pipes, conduit, and gas lines. Also available in a no cone design. See picture.

Packaging: IB factory fabricated cone flashings are shipped in various quantities in 25% post consumer cardboard boxes of assorted sizes.

Uses: IB factory fabricated cone flashings are typically installed around penetrations such as pipes, conduit, and gas lines.

Available Colors: Available in all IB membrane colors.
